

MSU Science Fest at Yankee Air Museum
47884 D St, Belleville, Michigan 48111

Saturday, April 25, 2020 | 10:00 A.M. – 4:00 P.M.

Sometimes the “invisible” is simply lying below the surface of a lake, behind the fuselage of a plane, or under the feathers of a bird’s wing. Join educators from Ann Arbor Hands-On Museum, Leslie Science & Nature Center, and Yankee Air Museum for an exciting day of discovery.

Dive into Lake Michigan as you explore how WWII pilots trained in the Great Lakes, or see birds of prey up close as you learn about how they are uniquely adapted for flight. Make your own chemical reactions, try engineering activities, and practice flying a plane in one of our flight simulators—there’s something for everyone at this all-day open house event!

We will have hands-on activities, museum tours, presentations/demos and workshops led by our educators, and possible some make-and-take activities for families.

FREE ADMISSION

All ages welcome!

Online Registration is required:
